PROFILE

Frontend Developer with 3+ years of experience crafting complex, high-performance web and mobile applications with React.js, Vue.js and the modern JavaScript ecosystem. From enterprise fintech-compliance platforms to AI document pipelines and cross-platform mobile apps, I turn ambitious designs into efficient, reusable component architectures and partner with cross-functional teams to ship polished products on time.

TECHNICAL SKILLS

Languages & Core	JavaScript, TypeScript, HTML5, CSS3
React Ecosystem	React.js, Next.js, Redux Toolkit, Gatsby, React Native (Expo)
Vue Ecosystem	Vue.js, Nuxt.js, Vuetify, Pinia, Vuex, Ionic
AI & ML	RAG pipelines, LLM integration, vector search (pgvector), prompt engineering, AI agents & tool-calling, Document AI / OCR (Gemini)
Styling & Data	Tailwind CSS, MUI, Node.js, GraphQL, REST APIs, WebSockets, SSE
Testing & QA	Cypress, Jest, Playwright

PROFESSIONAL EXPERIENCE

9 Series Pvt Ltd — **Frontend Developer** Present

Building enterprise SaaS across AI knowledge platforms, document verification and disability services — from RAG chat UIs and dashboards to cross-platform mobile apps.

> **AI Zone** — An AI-powered document-verification platform with batch ingestion and role-based access, where Gemini / Vertex-AI OCR classifies documents and extracts fields for human verifiers.
>
> - Built AI OCR classification & field-extraction workflows on Gemini / Vertex AI.
> - Implemented role-based access for Super Admin, Admin and Verifier personas.
> - Delivered live work-queue updates over WebSockets with Microsoft SSO sign-in.
>
> **Stack:** React 19, TypeScript, Vite, Redux Toolkit, MUI

> **Enterprise Knowledge Assistant** — A multi-tenant SaaS where organizations upload internal documents and ask questions in natural language, answered only from their own data with inline source citations through a full RAG pipeline.
>
> - Built retrieval-augmented chat with cited, token-streaming answers over SSE.
> - Supported multi-format ingestion — PDF, Word, Excel, web pages and more.
> - Shipped multi-tenant workspaces with role-based access control.
>
> **Stack:** Next.js 15, React 19, TypeScript, TanStack Query, Zustand

> **AbleFinder** — A mobile marketplace connecting disability-support participants with service providers — provider discovery, service agreements, subscriptions and push notifications.
>
> - Implemented participant ↔ provider matching and service-agreement flows.
> - Integrated Stripe subscriptions and Firebase push notifications.
> - Developed the React Native (Expo) app against a Next.js + PostgreSQL backend.
>
> **Stack:** React Native, Expo, Next.js, Drizzle ORM, Stripe

Vedlogic Solutions Pvt Ltd — **Frontend Developer** Feb 2024 – Present

Developed real-time trading interfaces and enterprise compliance platforms for international clients.

> **iBanq Sentinel** — A compliance and client-onboarding platform for financial services — multi-tier onboarding/offboarding workflows, document management, real-time chat and embedded analytics.
>
> - Built multi-step onboarding, KYC and document-management workflows.
> - Delivered real-time chat and notifications over WebSockets.
> - Embedded Superset analytics behind role-based access.
>
> **Stack:** React, TypeScript, Redux Toolkit, MUI, Tailwind CSS

Tread Aries — A stock-trading platform for US markets supporting equities and futures/options trading, powered by real-time streaming price data.

- Implemented real-time price streaming over WebSockets.
- Built equities and futures/options trading flows.
- Designed responsive, data-dense trading dashboards.

Stack: Vue.js, Vuex, WebSockets, streaming APIs

Nesoi Technology — Frontend Developer

Jun 2022 – Feb 2024

Delivered products across the full modern JS stack — from React CMS platforms to large-scale Vue-to-Nuxt migrations and cross-platform mobile apps.

Monotype — A leading provider of fonts and creative technologies; migrated their India project from a Vue 2 codebase to Nuxt 3, using GraphQL APIs to fetch and render data.

- Led the Vue 2 → Nuxt 3 migration and rebuilt the data layer on GraphQL.
- Covered the migrated components with Jest unit tests.

Stack: Vue 3, Nuxt 3, GraphQL, Pinia, Jest

Omni-Cloud — A CMS for web-building software management; built the platform UI with React and Tailwind CSS.

- Authored a reusable hook-based component library.
- Integrated REST APIs across the platform.

Stack: React.js, React Hooks, Tailwind CSS, REST APIs

Planfred — A construction project-management platform for organizing plans, documents and to-dos across teams.

- Shipped new mobile-app features with Vue and Ionic; fixed Vue 3 web-app defects.
- Authored comprehensive Cypress end-to-end test suites.

Stack: Vue.js, Ionic, Nuxt, Cypress

Sopra — An Irish PWA where dealers create loans and stock-list loans, and users apply for car loans and buy stocks.

- Built the progressive-web-app architecture with a Redux Toolkit state layer.

Stack: React, Redux Toolkit, TypeScript, React Router
